

SUSAN HARPER DEEPENING IN MYSTERY RETREAT

MAY 19-25, 2011 EDENVALE NEAR VANCOUVER, B.C. CANADA

This week is devoted to practices of awakening, silence and courtship of the mystery.

In this intensive, we allow time and space to open our hearts and attention, into the deep fruitful dark womb of the Earth, and the vastness of the generative imaginative cosmos.

We
Enter
Silence
Invite magic
Engage the process
Expect metamorphosis

We are participant
players in the
heart of creation
shaping a
shared reality,
and creatively
participating
in a contemporary
culture of awakening.

This is a time of letting go, shedding old skin realities and cultural spells, AND a time of receiving inner inspiration connected to planetary wisdom, and the seeds gestating in your human heart and soul that are ready for this time of evolutionary change.

WHAT WE WILL DO?

In deep long movement dives, we breathe, slow down, sound, listen, rest into spacious silence, and deepen our capacity for fluid grounded embodiment of our creative envisioning.

We explore the intelligent dynamics of the elements—water, air, fire, earth, and space—in our bodies; deepening our inherent connection to the wild breathing planetary body.

For our vision quest allnighter we will adorn the room with shamanic textiles to stimulate the imaginal, psyche processes, and to support our dreamtime journeys for healing and envisioning. We co-create ceremony as we join those—visible and invisible—who tend the indigenous soul and beauty of this world.

SUSAN HARPER brings her thirty-six years of experience teaching Continuum Movement internationally to the work she has developed: Em'oceans and Sensations Trainings, Dreamtime, and with Hubert Godard Portals of Perceptions. She has also been influenced by the work of Michael Meade, Reggie Ray, Christine Price, David Whyte and John O'Donohue.
