

The Six Servants

A Journey into the Soul of Relationship

with Penny Allport

Through the oral tradition of storytelling, meet *The Six Servants*, archetypal characters re-discovered in a timeless European teaching myth.

In a circle of inquiry, through meditation, dream work, writing, ceremony and the theatre of embodied imagination we evolve outdated relational habits, and grow in our latent capacities and longings to relate with all of life.

Through daily embodied practices of awareness, we directly experience and receive the perceptual gifts of these characters, here to serve the most “rigorous spiritual practice” known to human kind - Relationships!

Through playful curiosity and care, we discover new ways of meeting and being met by the world, in the fullness of our unique and embodied soulful expression.
